Serial No.: 10/518,320
Filed: August 17, 2005
Confirmation No.: 6742

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listing of claims in the application.

Listing of Claims:

Claim 1 (Previously Presented) A w/o emulsion antiperspirant composition comprising an oil continuous phase and at least one aqueous dispersed phase, wherein the composition further comprises a dissolved antiperspirant salt, an emulsifier and a polymer comprising Brønsted acid groups wherein the dissolved antiperspirant salt is in an aqueous dispersed phase and the polymer comprising Brønsted acid groups is in a phase separate from that of the dissolved antiperspirant salt, and wherein the proportion of aqueous dispersed phase (s) within the total composition is from 50% to 90% by weight, excluding any volatile propellant that may be present.

Claim 2 (Original) An antiperspirant composition according to claim 1, wherein the polymer comprising Brønsted acid groups is suspended as a solid in an oil continuous phase.

Claim 3 (Previously Presented) An antiperspirant composition according to claim 1, comprising an aqueous solution of the polymer comprising Brønsted acid groups emulsified as a separate aqueous dispersed phase.

Claim 4 (Previously Presented) An antiperspirant composition according claim 1, comprising a silicone oil.

Attorney Docket No.: J3672(C)
Serial No.: 10/518,320
Filed: August 17, 2005
Confirmation No.: 6742

Claim 5 (Previously Presented) An antiperspirant composition according to claim 1, wherein the emulsifier is a silicone derivative.

Claim 6 (Previously Presented) An antiperspirant composition according to claim 1, wherein the emulsifier is present at from 0.4% to 0.6% by weight.

Claim 7 (Original) An antiperspirant composition according to claim 2, wherein the level of Brønsted acid groups in the polymer is less than 4 mmole/g.

Claim 8 (Cancelled)

Claim 9 (Previously Presented) A method of reducing perspiration comprising the application to the human body of a w/o emulsion composition as described in claim 1.

Claim 10 (Previously Presented) A method of manufacture of an antiperspirant composition as described in claim 1, said method comprising emulsification of an aqueous solution of an antiperspirant salt in an oil continuous phase, followed by mixing of the emulsion so formed with a separate phase comprising a polymer comprising Brønsted acid groups.

Claim 11 (Previously Presented) An antiperspirant composition according to claim 1 wherein the Brønsted and acid groups are selected from carboxylic acid groups, sulphonic acid groups and phosphonic acid groups, and anhydride groups and wherein the Brønsted acid groups may be present in their protonated form or in their neutralized form as salt groups.

Attorney Docket No.: J3672(C)
Serial No.: 10/518,320
Filed: August 17, 2005
Confirmation No.: 6742

Claim 12 (Previously Presented) An antiperspirant composition according to claim 1 wherein the polymer comprising Brønsted acid groups has an acid value of greater than 320.

Claim 13 (Previously Presented) An antiperspirant composition according to claim 1 wherein the proportion of aqueous dispersed phase(s) within the total composition is from 70 to 90% by weight, excluding any volatile propellant that may be present.

Claim 14 (New) An antiperspirant composition according to claim 1 in which volatile propellant is present at a level of from 30 to 95% by weight.
